**SENSIENT NATURAL INGREDIENTS EARNS NON-GMO  
PROJECT VERIFICATION**

*California-grown garlic, onion and parsley lines included in certification for rigorous  
best practices for GMO avoidance*

**TURLOCK, California** — In an effort to further strengthen its commitment to cultivate natural, wholesome products and solutions, Sensient Natural Ingredients has earned Non-GMO Project Verification for its California-grown [garlic](#), [onion](#) and [parsley](#).

[The Non-GMO Project](#) offers North America's only independent verification for products made according to rigorous best practices for GMO (genetically modified organisms) avoidance. GMOs are living organisms whose genetic material has been artificially manipulated in a laboratory through genetic engineering.

"Sensient Natural Ingredients leverages trusted relationships with generations of farmers in California in order to provide traceability, stability and sustainability to our customers," said Ryan Goularte, general manager of Sensient Natural Ingredients. "The Non-GMO Project verification supports the rigorous standards we already have in place and continuously improve upon to deliver the highest-quality natural ingredients."

In addition to Non-GMO Project verification, Sensient Natural Ingredients' California-grown garlic, onion and parsley lines meet BRC Global Standards and are certified kosher, halal and gluten-free.

#### About Sensient Natural Ingredients:

Based in Turlock, California, Sensient Natural Ingredients (SNI) is a producer of farm-to-table ingredients and solutions that cultivate natural ingredients to bring flavor, texture, color and nutrition to food products while keeping labels clean and simple. All of SNI's products are certified gluten-free and kosher. [www.sensientnaturalingredients.com](http://www.sensientnaturalingredients.com)

Sensient Natural Ingredients is a unit of Sensient Technologies Corporation. Sensient Technologies Corporation is a leading global manufacturer and marketer of flavors, colors and fragrances, employing advanced technologies to develop specialty food and beverage systems, cosmetic and pharmaceutical systems, inkjet and specialty inks and colors, and other specialty and fine chemicals.

#### About the Non-GMO Project:

The Non-GMO Project, a 501(c)3 organization, offers North America's only third-party verification and labeling for non-GMO foods and products. It has verified nearly 35,000 products from more than 1,900 brands, representing well over \$13.5 billion in annual sales. "Non-GMO Project Verified" is one of the fastest-growing labels in the natural food sector, and it increasingly is an attribute sought by conventional brands.
