**SENSIENT TECHNOLOGIES CORPORATION OPENS SINGAPORE
INNOVATION CENTRE FOR FLAVORS, FRAGRANCES, COLORS &
SPECIALTY INGREDIENTS**

Strategic site offers a collaborative environment for product development and customer engagement

World Class labs capitalize on industry leading technologies in order to accelerate product development

SINGAPORE — Sensient Technologies Corporation, a leading global manufacturer and marketer of flavors, colors and fragrances, celebrated the grand opening of its technical development and application centre in Biopolis One, Singapore. The new facility will allow local Sensient units and customers to develop product solutions from locally developed initiatives based on Sensient’s global product portfolio.

Sensient will employ food scientists, flavorists, color chemists and applications scientists from all of its business units in order to serve the development needs of customers in the region. The centre is equipped with state-of-the-art application lines as well as key developmental equipment which give the company the unparalleled ability to replicate customer conditions in many market segments, including food and beverage, fragrance, cosmetics and pharmaceuticals.

“This facility enables us to replicate our customers’ own manufacturing processes, making it easier to develop products and technologies that can be tailored to their specific application environments, explained Paul Manning, President and CEO for Sensient Technologies Corporation. “It is these globally connected innovation centres where our people and our insight into our customers’ processes have enabled us to achieve a position of strength in our local markets. The new facility will enable us to work more closely with our customers to satisfy

their product, application technology and innovation requirements, as well as helping to inspire their next generation of products.”

About Sensient Technologies Asia:

Sensient Technologies Asia is a division of Sensient Technologies Corporation, a leading global manufacturer and marketer of flavors, colors and fragrances, employing advanced technologies to develop specialty food and beverage systems, cosmetic and pharmaceutical systems, inkjet and specialty inks and colors, and other specialty and fine chemicals.
